ALGO

- Initialize data structures: camera List, users, and wallet.
- Add initial camera and user data.
- Display welcome message and request login.
- Validate user credentials.
- Set logged-in user if valid.
- Show main menu options.
- Perform actions based on user's choice:
    - Manage user's cameras.
    - Rent available cameras.
    - View all cameras.
    - Check wallet and deposit.
    - Exit.
- In "My Camera" section:
    - Add, Remove, View My Cameras, Go Back options.
    - Perform corresponding actions.
- In "Rent a Camera" section:
    - Prompt for camera ID and rental period.
    - Update status, deduct rent, and add to user's list.
    - Display error if insufficient funds.
- View details of all cameras.
- View current wallet balance and deposit more.
- If deposit chosen, update wallet balance.
- Continue main menu loop until exit.
