

ALGO

- Plan & Design: Define goals, sketch wireframes, and organize files.
- Build the Shell: Write HTML structure for key sections (navigation, menu, contact, etc.).
- Fill it Up: Add text, images, and menu items.
- Style it Right: Use CSS to make it beautiful and responsive.
- Make it Interactive: Add JavaScript for form validation, toggles, and other features.
- Polish & Test: Check for bugs and optimize for speed across devices.
