Crypto Intern at Bharat Electronics Limited

Demonstrated expertise in Bitcoin and Ethereum, navigating blockchain evolution with proficiency in proof-of-work and proof-of-stake consensus. My role involved a deep understanding of NFTs and their impact in art, gaming, and entertainment.

Duration: Apr 2022 – May 2022

UI/UX Designer at Hydrasoft Technology

Developed an incentivized scrap management interface, designed on Figma, and implemented a local recycling process. Managed data storage using MongoDB for scalability. Key role in the successful execution of the waste management system.

Duration: Aug 2018 – Jul 2022

Fire Detection System Using GSM

Explored fire alert system, combining Arduino Uno, GSM Module Communication System, and C++ programming. Swiftly detect fire incidents and receive instant SMS or call alerts. This proactive approach aids in preventing severe damage to properties and potentially saving lives; property owners can take swift action to address fire incidents promptly. The system also includes real-time monitoring capabilities.

Train Smart Eat Smart UI/UX Design

The UI/UX design of the fitness and nutrition revolves around catering to individual preferences and style. The color scheme, typography, and overall aesthetics align with users' personal tastes, creating a visually engaging and enjoyable experience. This design prioritizes ease of use with intuitive navigation. Clear labels and recognizable icons ensure seamless interaction for a user-friendly experience.
